

MetaMask is a software cryptocurrency wallet used to interact with the Ethereum and other blockchain networks. It allows users to access their wallets through a browser extension or mobile app, which can then be used to interact with decentralized applications.

- Supported browsers: Chrome, Firefox, Brave, and Edge
- Supported OS: iOS, and Android

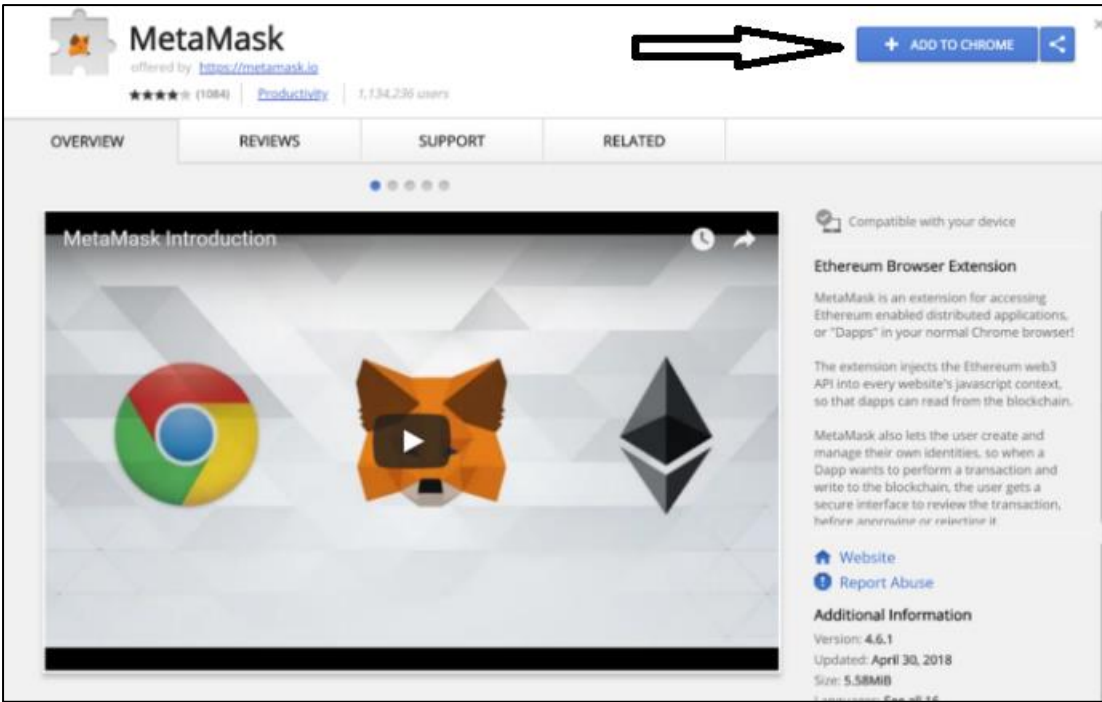

We'll use Chrome in this document but the steps are pretty much the same with every browser.

1. Install MetaMask on your browser

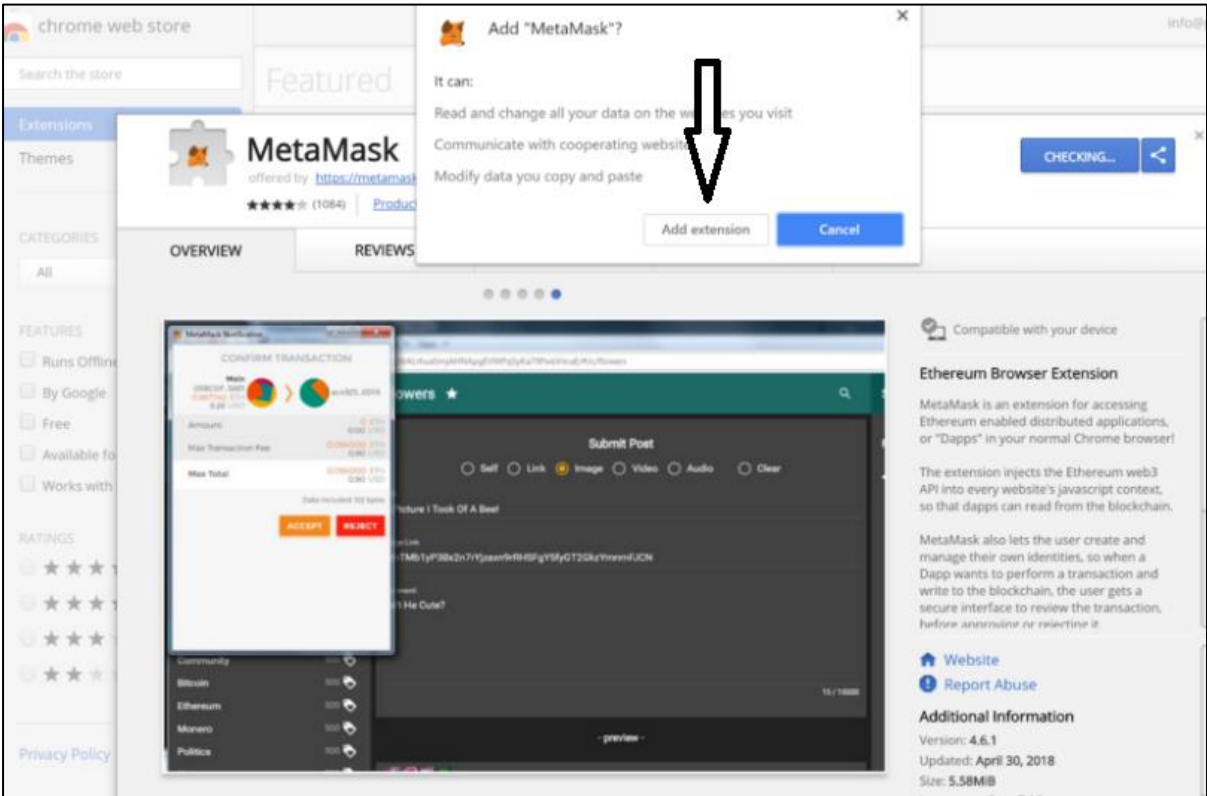

- Go to <https://metamask.io/download> and click **Install MetaMask for Chrome** button. This will add Chrome extension to your browser.

- Click **Add to Chrome**.

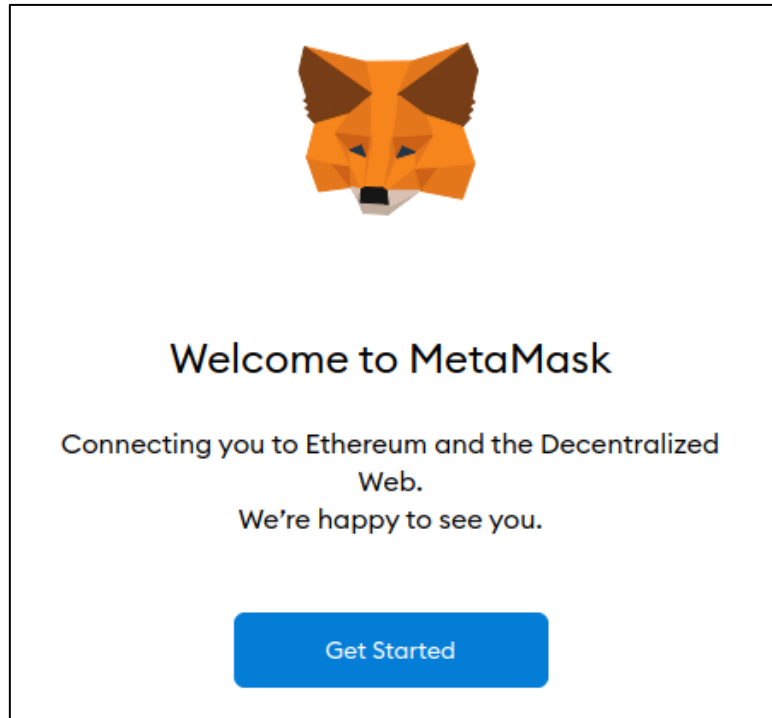

Click **Add Extension**.

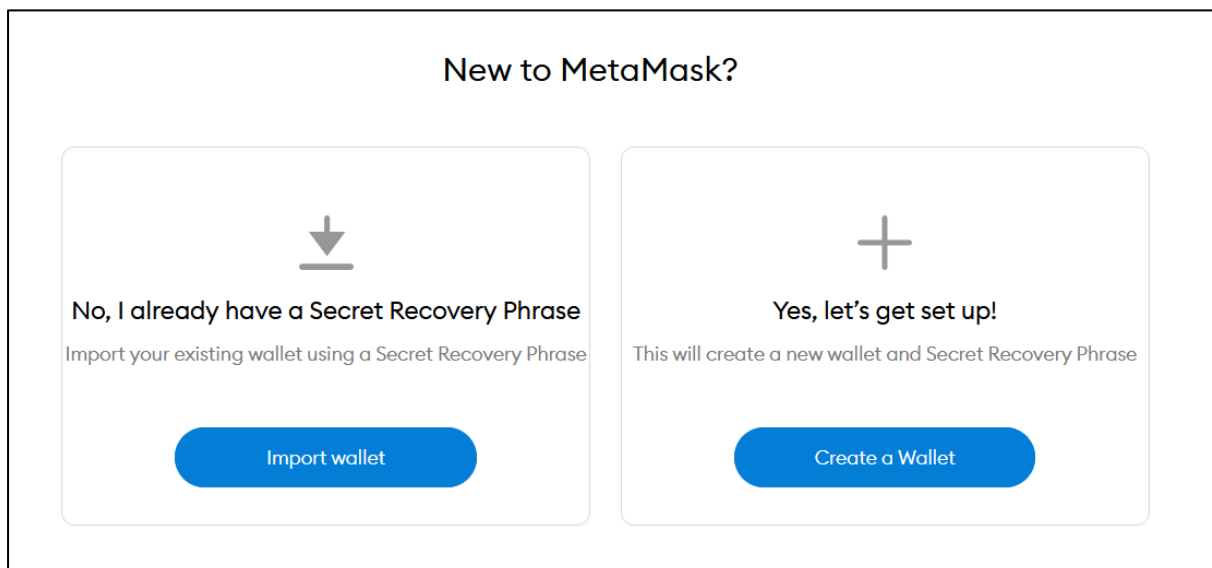

And that's it. MetaMask is now installed on your browser.

2. Setup an Account

- Click on the MetaMask extension icon in the upper right corner of your browser to open MetaMask.
- Click **Get Started**.

- Click **Create a Wallet**

- Click **I Agree** if you agree with MetaMask to collect your usage data for improvement.

 **METAMASK**

Help us improve MetaMask

MetaMask would like to gather usage data to better understand how our users interact with the extension. This data will be used to continually improve the usability and user experience of our product and the Ethereum ecosystem.

MetaMask will..

- ✓ Always allow you to opt-out via Settings
- ✓ Send anonymized click & pageview events

- ✗ **Never** collect keys, addresses, transactions, balances, hashes, or any personal information
- ✗ **Never** collect your full IP address
- ✗ **Never** sell data for profit. Ever!

This data is aggregated and is therefore anonymous for the purposes of General Data Protection Regulation (EU) 2016/679. For more information in relation to our privacy practices, please see our [Privacy Policy here](#).

- Enter your password and click **Create**.

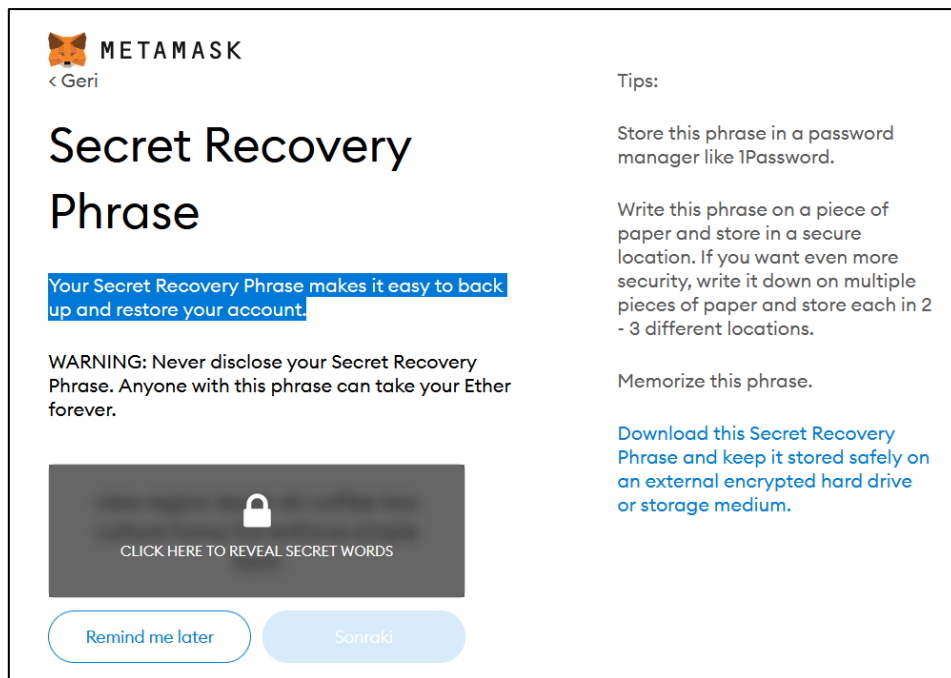

Create Password

New Password (min 8 chars)

Confirm Password

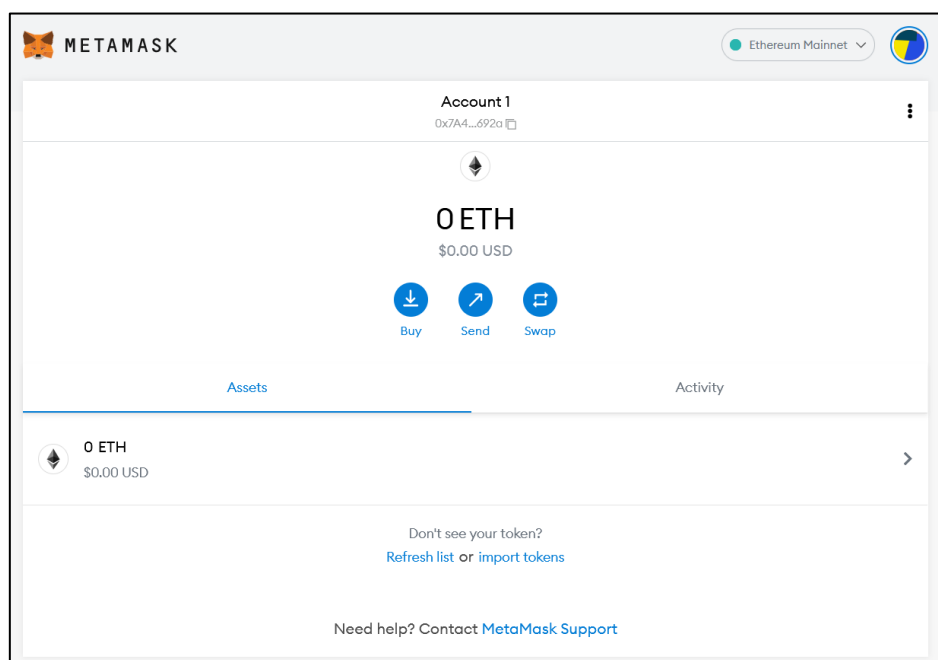

[Import with seed phrase](#)

- Click **Reveal Secret Words**. Memorize or write down this words since it's not advised to store this secret digitally. Anyone with this words can steal your funds. So, be careful.

- Verify your secret phrase by selecting the previously generated phrase in order. Click **Confirm** to complete the setup.

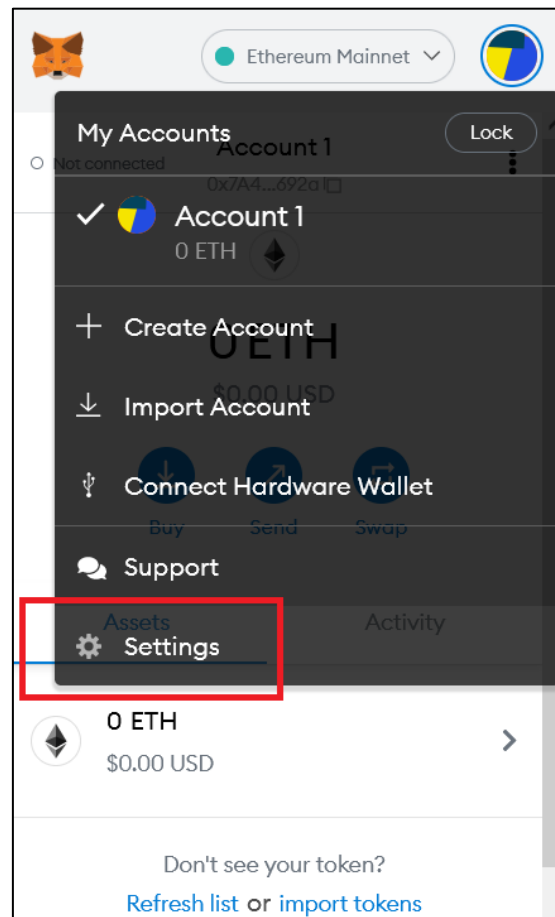

Congratulations. You've successfully created your Metamask account.

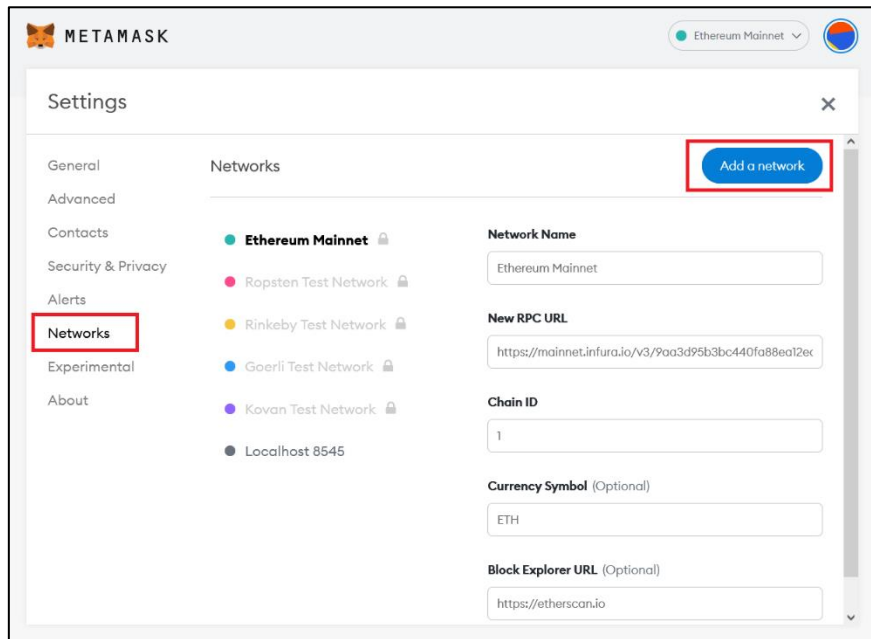

3. Add Binance Smart Chain to your MetaMask

MetaMask, by default, comes with Ethereum network. We need to add BSC network to our MetaMask in order to play Oceanland. Please follow the steps below.

- Select **Settings** from the dropdown menu.

- Switch to **Networks** tab and click **Add a network**.

- Enter parameters below into corresponding fields, and click **Save**.

Network Name: Binance Smart Chain

New RPC URL: <https://bsc-dataseed.binance.org/>

ChainID: 56

Symbol: BNB

Block Explorer URL: <https://bscscan.com>

Networks > Add a network

i A malicious network provider can lie about the state of the blockchain and record your network activity. Only add custom networks you trust.

Network Name

New RPC URL

Chain ID **i**

Currency Symbol (Optional)

Block Explorer URL (Optional)

Cancel **Save**

- Now you can use BSC on MetaMask.
